-

Professional Experience

Odoo Developer

Dec 2023 - Present | TAYAL S.P.A, Relizane

- Participated in project planning activities, including requirement analysis, task breakdown, and estimation for multiple ERP modules.
- Designed and customized Odoo modules (Employee Management, Recruitment, Occupational Medicine), contributing to alignment with business objectives and process optimization.
- Led the development of a Contract Lifecycle Management (CLM) system, coordinating with legal and finance departments to ensure compliance and workflow accuracy.
- Ensured cross-functional coordination with HR, legal, and finance teams to gather requirements and validate deliverables.
- Monitored development progress and tracked task completion against project timelines, ensuring adherence to deadlines.
- Maintained regular communication with stakeholders to provide updates, gather feedback, and adjust implementations when needed.
- Contributed to project deliverables and milestones, ensuring timely and quality releases.

- Developed reporting tools (QWeb) to support decision-making and performance tracking.
- Delivered user training and post-deployment support, ensuring smooth adoption and operational continuity.

Web Developer (Freelance)

Jan 2023 - May 2023

- Participated in project scoping and planning, defining core features and technical architecture of an e-learning platform.
- Designed and implemented backend functionalities (authentication, user management, content delivery) using Flask and REST APIs.
- Coordinated with stakeholders to clarify requirements and prioritize features.
- Monitored development progress and ensured alignment with project timelines and delivery expectations.
- Performed testing and debugging to ensure quality standards and system reliability.
- Delivered the project within agreed timelines, contributing to client satisfaction and objective achievement.

Technical Project Assistant

Mar 2022 - Jul 2022 | COJM 2022, Oran

- Supported project planning and coordination for large-scale event infrastructure deployment.
- Collaborated with multiple stakeholders to define technical requirements and implementation strategy.
- Assisted in coordinating IT teams responsible for network setup, video systems, and technical logistics.
- Contributed to progress monitoring and reporting, ensuring visibility on project status.
- Produced technical documentation to support execution, tracking, and knowledge transfer.
- Helped ensure timely delivery of technical components aligned with project milestones.

Computer Science Teacher

Feb 2021 - Jun 2021 | El Hayat School, Oran

- Planned and delivered structured lessons aligned with educational objectives and timelines.
- Monitored student progress and adapted teaching methods to ensure learning outcomes were achieved.

- Maintained communication with school administration regarding curriculum progress and student performance.
-
